SAI SUMANTH TALLORIE

Clinical Programmer II

Veeva EDC | Veeva CDB | Python Programming

PROFESSIONAL SUMMARY

Clinical Programmer II with 4.6+ years of experience in Clinical Data Programming, specializing in Veeva EDC, Veeva CDB, Python automation, Data cleaning and reporting using Python. Proven expertise in leading end-to-end clinical studies, developing automation solutions, managing study builds, and delivering high-quality clinical databases while mentoring team members and ensuring compliance with SOPs and industry standards.

CORE STRENGTHS

- End-to-End Clinical Study Oversight and Delivery across Functional and Full-Service Studies.
- Veeva EDC & Veeva CDB Programming.
- Python-based Data Cleaning and Clinical Data Reporting.
- Data ingestion using Python APIs.
- SOP Compliance & Adherence, Process Improvement.
- Mentoring 10+ team members and facilitating cross-functional collaboration.

TECHNICAL SKILLS

Clinical Platforms: Veeva EDC, Veeva CDB, Viedoc EDC

Programming: Python (APIs, NumPy, Pandas, Tkinter), JavaScript, HTML, Postman, Domino

Clinical Programming: eCRF Design, Edit Checks, Database Build, Validation, Deployment, Post-Production Changes, Data Listings, Study Lead Activities

PROFESSIONAL EXPERIENCE

Clinical Programmer II | Syneos Health | Oct 2025 – Present

- Lead clinical data cleaning and reporting activities by developing analysis-ready data listings and customized reports using Python.
- Collaborated with the Standards team in the creation and maintenance of Veeva Library components to improve study build efficiency and consistency.
- Manage end-to-end Veeva CDB activities, including study configuration, data pipelines, transformations, validations, data quality oversight, and production deployments.
- Developed Python-based file migration solutions to automate secure data movement, improve operational efficiency, and reduce manual migration efforts.
- Provide programming support for 15+ Post Go-Live (PGL) studies, including maintenance, enhancements, validations, and issue resolution.
- Support cross-functional teams while mentoring junior programmers and ensuring timely study deliverables.
- Drive process improvements through optimized edit checks and workflow automation.

Clinical Programmer I | Syneos Health | Nov 2024 – Sep 2025

- Led end-to-end Veeva and Viedoc study builds across 20+ clinical studies, including eCRF design, edit checks, UAT, validations, deployments, and post-production support.
- Developed Python automation for audit trail downloads and secure clinical data transfers.
- Served as Study Lead for Consumer Health studies while coordinating cross-functional activities.
- Supported Veeva CDB programming, validation, and study maintenance activities.

Associate Clinical Data Programmer | Syneos Health | Jan 2022 – Oct 2024

- Built and maintained clinical databases, eCRFs, edit checks, data listings, and project tracking reports.
- Performed database testing, external data integrations, data transfers, and study documentation activities.
- Collaborated with sponsors and project teams to deliver high-quality clinical databases within defined timelines.

EDUCATION

Master of Computer Applications (MCA)

KLE Institute of Technology (Visvesvaraya Technological University) | 2021

Bachelor of Computer Applications (BCA)

Vijayanagar College (Vijayanagara Sri Krishnadevaraya University) | 2019
